SUMMARY

Flutter developer focused on building responsive UIs, admin panels, and real-time apps with Firebase. I also explore full-stack development using Tailwind CSS, Node.js, and Express, and enjoy creating clean, intuitive, and scalable user experiences.

SKILLS

Programming: Dart, Java, Python, C, JavaScript, HTML, CSS, JavaScript
Frameworks / Tools: Flutter, Firebase (Firestore, Auth, Storage), GetX, Provider, Node.js, Cloudinary, Git
Expertise: UI/UX Design, State Management, REST APIs, Real-time Apps, Responsive Frontend Development

EXPERIENCE

Flutter Developer Intern   **Dec 2025 – Present**
Chawk Company   *Online Internship*
  – Developing Flutter UI components and app features using clean architecture and reusable widget patterns.
  – Integrating Firebase Authentication, Firestore, and Storage for backend functionality and real-time sync.
  – Collaborating remotely with engineering teams to deliver iterative releases and optimize performance.

Tech Associate   **Mar 2025 – Present**
E-Cell, VITB   *On-site*
  – Contributed to the development of the E-Cell Website using Flutter for web, creating pages, navigation flows, and dynamic UI components.
  – Improved responsiveness, animations, and overall user experience across devices.

PROJECTS

Hiring Competitions — Admin Portal | *Flutter, Firebase*
  – Admin portal for managing competitions, applicants, and workflows with protected routing.
  – Implemented real-time Firestore dashboards and persistent authentication with reusable UI components.

E-Cell Website | *Flutter Web*
  – Developed full Flutter Web UI with responsive layouts, animations, and reusable components.
  – Built event pages, announcements, navigation flows, and mobile-friendly interactions.

Chat App | *Flutter, Firebase*
  – Real-time chat system using Firestore with message syncing, timestamps, and smooth UI.
  – Built responsive chat screens with scalable widget structure.

HostelFeast — Admin Panel | *Flutter, Firebase, Cloudinary*
  – Admin dashboard for weekly menus and meal tracking with Firestore real-time updates.
  – Integrated Cloudinary for optimized food image handling and GetX for state management.

ADDITIONAL UI PROJECTS (PRACTICE WORK)

  • **Food Ordering App (UI Only):** Created responsive UI screens in Flutter to practice layout design and animations.

  • **Sportz App (UI Only):** Designed front-end UI workflows to improve Flutter widget structuring and styling.

EDUCATION

B.Tech – Vishnu Institute of Technology   **2023 – Present**
CGPA: 9.21

CERTIFICATIONS

  • **NPTEL – Programming in Java**

  • **NPTEL – Joy of Computing with Python**

  • **LeetCode: 50+ day streak, 80+ DSA problems solved**
